**Progressive Insurance Not
Compassionate “Nobody should do
business with them.”**

CEO Peter Lewis inherited his father’s business, the miss-labeled “Progressive Insurance.” He is responsible for the most malicious insurance company in America.

According to its website—helping accident victims is not a priority. Instead “Our goal is to grow as fast as possible, constrained only by our profitability objective and our ability to provide high quality customer service. Progressive is a growth-oriented company and management incentives are tied to profitable growth.”

Progressive is earning its sordid reputation as one of the most ruthless carriers. Miss-labeled because Progressive implies a social tolerance embracing “peace and social justice.” Its behavior is otherwise. Progressive leads the field in low than norm settlements, high litigation ratios and failing to honor medical bills---burdening consumers, harming doctors and clogging the courts.

Peter Lewis not such a nice guy but pro dope & anti people.

We don’t mind that he is an advocate of marijuana –busted in 2000 in New Zealand—but when he gave some \$12.5 million, 2004, to MoveOn.Com with radical George Soros---he is using his profits- belittling victims to support his strange political causes—not to improve his company’s performance.

We have the freedom not to ever buy a “Progressive” product. Tell your patients.

Is CSAA Violating Assignments?

We are getting reports that CSAA is back to its old practice of not honoring Assignments. Instead CSAA is mailing med pay checks to patients in defiance of legal and binding Assignment of Benefits.

Let us know every time that CSAA is doing this to your practice. CSAA certainly knows it is driving a wedge between you and your patients.

- **Begin to warn your patients.**
- **Document in a letter to CSAA each time this occurs—remind CSAA they are purposely defying a written agreement between you and your patient.**
- **Contact the CCA so they can begin to lobby CSAA.**

We will carefully monitor this activity. There are certainly important legal theories that could draw CSAA into another season of damaging litigation which harms its public reputation.
